

General Description

The **BMUX3-MDM-4DS3A** is a System-On-Chip (iSOC) solution that interfaces on one side to four (4) DS3 Asynchronous multiplexers at an aggregate rate of 4x44.736Mb/s and to a High-Speed DAC/ADC on the other. The module contains all transport overhead Mux-Demux functions, High-Efficiency Triple Error Correction (HE-TEC), Phase-Resolving, Adaptive Equalizer, FIR filters, Error Performance Computations, and microprocessor interfacing circuitry.

Applications

The **BMUX3-MDM-4DS3A** finds applications in:

- Radio/Wireless high-capacity Transport and Distribution systems
- First mile/Last mile millimeter wave radios
- 30MHz RF channelization plans

Features

The **BMUX3-MDM-4DS3A**'s main features are:

- High-Efficiency Triple Error Correction (HE-TEC)
- Fully digital Adaptive Equalizer and FIR filters
- Four (4) DS1 Wayside
- Extensive transmission impairment monitoring
- Error corrected Orderwire, and Data channels
