

## General Description

The **BMUX4-RSL1A** is a System-On-Chip (iSOC) solution that interfaces on one side to a Sonet/SDH/ATM multiplexer or any Mux-Demux at 155.52Mb/s and to a High-Efficiency 128QAM Quadrature Modem on the other. The module contains all transport overhead Mux-Demux functions, High-Efficiency Quadruple Error Correction (HE-QEC), Phase-Resolving, Error Performance Computations, and microprocessor interfacing circuitry.

## Applications

The **BMUX4-RSL1A** finds applications in:

- Radio/Wireless high-capacity Transport and Distribution systems
- First mile/Last mile millimeter wave radios

## Features

The **BMUX4-RSL1A**'s main features are:

- High-Efficiency Quadruple Error Correction (HE-QEC)
- Extensive transmission impairment monitoring
- Applicable to 128QAM quadrature modulation
- Error corrected Orderwire, Data channels that meet Sonet/SDH/ATM requirements
